

# Skin Care Solutions

*Gojo Knows How To Prevent Irritant Contact Dermatitis*

**Skin disease is the leading cause of occupational illness and one of the most costly and rapidly expanding medical conditions in industry today. Also, illness can have a huge impact on your business results in terms of increased absenteeism or presenteeism (i.e., coming to work sick) and decreased productivity.**

**Swisher** offers two hand hygiene programmes that address these issues.

The first is The **GOJO Hand Hygiene Programme for Manufacturing Facilities**

**GOJO have** conducted decades of research in different occupational settings on product formulations, and worker needs and behaviours around the world.

The result is **GOJO Skin Care Solutions**, a comprehensive skin care programme that improves skin condition, a critical part of reducing worker risk for illness and cutting employer costs.

## **GOJO® Multigreen Hand Cleaner - All purpose medium-duty hand cleaning**

General purpose liquid soap with scrubbing particles.

- Incorporates a natural plant-derived solvent (Dipentene).
- Versatile hand cleaning. Broad industrial use.
- Removes a wide variety of soils.

## **GOJO® Natural Orange Heavy Duty Hand Cleaner With Pumice**

Pumice hand cleaner formulated with a natural citrus solvent (D-Limonene), Natural Orange works fast to provide deep and effective cleaning to remove grease, oil and grime and other common soils that are not severe enough to require the use of specialised heavy duty hand cleaner.

## **GOJO® HAND MEDIC® Professional Skin Conditioner**

Moisturizes and conditions hardworking hands.

- Quickly improves the condition of rough, dry, damaged skin.
- Helps restore a healthy appearance and feel of workplace hands.
- Helps maintain the skin's natural barrier to stay healthy

## **Hand Regimen Guarantee**

**GOJO® HAND MEDIC® is part of the GOJO Professional Hand Care Regimen Family. When used in combination with any of our GOJO Heavy Duty Professional Hand Cleaners, the look and feel of professional hands are guaranteed to improve in 14 days.**

The second hand hygiene programme is The **PURELL® Programme for Workplace Wellness**, which helps stop the spread of germs and illness. Since most germs that can cause illness are spread by hands, this programme focuses on stopping the spread of germs in work environments - and can bring immediate benefits once it is implemented.

The **PURELL® Programme for Workplace Wellness** includes:

- **PURELL®** Approved for use in the NHS and the number 1 brand of instant hand sanitizer. **PURELL®** kills 99.99% of most common germs that may make you sick. It's the brand people know and trust.
- **PURELL®** Pal, Desk Caddy. Put PURELL where it's most needed, on the desktop, where the germs are. And make sure it's accessible in other locations where employees come in contact with germs like work sites, meeting rooms, break rooms, cafeterias and workbenches.
- Educational materials to encourage use. Brochures and Posters. Everything you need to educate employees on how to reduce the spread of germs in the workplace.

**PURELL®** has already proven its ability to help reduce absenteeism in hospitals, schools and college dormitories. But a more recent case study conducted at FedEx Custom Critical demonstrated a reduction of 21% in absenteeism due to illness when PURELL was provided on the desktop and in other common work areas. Imagine the results you could achieve in your facility.
