

# NOW THE SMOKE HAS CLEARED, ARE YOUR PREMISES AS CLEAN AND ODOUR-FREE AS THEY COULD BE?

Since the smoking ban came into effect in the UK, many pubs, clubs and restaurants are experiencing problems with lingering, unpleasant odours. Who would have thought that the smell of nicotine would mask so many malodorous smells?

Swisher can help you transform your premises into the clean, pleasant and odour-free environment it should be to ensure that your customers visit is as enjoyable as possible. We have a range of products and services designed to combat these unpleasant odours.

**SWISHER TOTAL IMAGE™** - The Swisher Total Image System is a complete service package designed to ensure that your premises has the cleanest, most hygienic environment possible. Our high-tech detailing unit delivers a powerful cleaning solution to the designated area, including floors, ceilings, partitions, vents, handles and latches. This service is designed to give the area a deep-clean treatment and ideally should be repeated on a quarterly basis, or as you require.

**SWAT** - The Swisher Anti-microbial Treatment ensures a thorough, even distribution of germ-killing power with our hospital-grade germicide, even in the hardest-to-reach areas. This reduces odour causing bacteria and can help to keep your premises clean and odour-free. The germicide is safe to use on furniture and electrical equipment and not harmful to humans.

**TCELL ODOUR CONTROL SYSTEM** - An advanced system that uses hydrogen-based technology to deliver a continuous dose of fragrance and odour neutraliser for up to 60 days, without the use of batteries. An innovative, patented product that uses no propellants or added VOCs, so is friendly to the environment too! Comes in a range of fragrances and various dispenser colours, including chrome.

Please ask for details on other Swisher products and services, including:  
Weekly Manual Service, Feminine Hygiene Service, Water Management Systems,  
Hand Hygiene Programmes, Paper Products and Soaps

Call Swisher today to see how easy and affordable it can be to give your facilities the treatment they deserve.
