

INTRODUCING THE SWISHERCUBE

EXPERT PRODUCTS & EXPERT PROGRAMMES MAKE ALL THE DIFFERENCE

WOULD YOU LIKE TO SAVE MONEY AND HELP THE ENVIRONMENT?

Swisher can achieve both of these objectives by using the **Swishercube**.

Exclusive to Swisher, the **Swishercube** is a waterless product which will reduce the water used in urinals by up to 100% (depending on the type of urinal you have installed).

The **Swishercube**, in many cases, could save your business, on average, over £200 per urinal per annum, excluding maintenance costs.

The **Swishercube** uses the very latest in microbial technology. Highly effective bacteria feed on the uric scale that forms in pipe work and waste traps. The all-natural microbes in the **Swishercube** will reduce organic blockages and maintain an overall healthier washroom environment.

Directions for use:

Place **Swishercube** in the urinal bowl underneath the urinal mat.

Maintain your usual daily cleaning regime, plus Swisher's Hygiene Service if applicable.

Turn water supply off after 1 week.

Replace **Swishercube** monthly.

Please ask for details on other Swisher products and services, including:
Weekly Manual Service, Feminine Hygiene Service, Swisher Total Image, Anti-Microbial Misting, Odour Control, Hand Hygiene Programmes, Paper Products and Soaps

Call Swisher today to see how much money you could save and give your urinals the treatment they deserve.
